

LAKSHYA RAO

Security Engineer • CSIRT • SOAR & SIEM Automation • Penetration Testing • Cloud Security

Greater Noida, India | +91 99112-31585 | lakshyarao22@gmail.com | inqstv.in | github.com/lakshyarao22

PROFILE SUMMARY

Security Engineer with 4+ years of experience across SOC operations, incident response, SIEM engineering, SOAR development, penetration testing, and cloud security. Currently a key member of a CSIRT team at a global network security company, where I architect security automation that has reduced incident response times by over 60%, build detection content across enterprise SIEM platforms, develop end-to-end SOAR integrations, and perform web application penetration testing. Strong software engineering background — building production automation in Python, serverless functions on AWS, Chrome extensions, mobile applications, and AI-powered security tooling.

KEY ACHIEVEMENTS

4 SOAR Integrations

Built end-to-end from scratch

10+ Detections Deployed

Covering cloud, auth, and brute force

86 Tickets Closed

In single sprint (Vande Blitz)

10 IR Playbooks

Authored for active detections

13+ Use Cases Tuned

Reduced false positives significantly

8+ Incidents Resolved

Malware, data leaks, brute force

~60% Faster Triage

Via automated enrichment

7-Phase Org Scan

Company-wide endpoint deep scan

PROFESSIONAL EXPERIENCE

Security Engineer — CSIRT | WatchGuard Technologies, Noida

Aug 2023 – Present

Member of the Computer Security Incident Response Team. Responsible for security engineering, automation development, incident response, penetration testing, and SOC tooling across multi-cloud infrastructure.

SOAR Platform Development

- Threat Intel Enrichment (AbuseIPDB, VirusTotal)** — Automated IP/domain/hash enrichment, reducing per-alert analysis time by ~60%
- Endpoint Isolation (EPDR)** — Full API integration for automatic machine isolation during malware incidents
- Email Analysis (Microsoft Exchange)** — Automated phishing analysis and company-wide email containment actions
- Workflow Automation (n8n)** — Integrated threat intel with Jira/Zendesk for automated case creation and escalation

SIEM Engineering (Splunk Enterprise Security)

- Deployed 10+ new detection use cases (AuthPoint, AWS, brute force, cloud misconfigs)

- Fine-tuned 13+ use cases — significantly reducing false positive rates
- Implemented drilldown searches for one-click investigative pivots across all use cases
- Engineered Microsoft Teams notifications stratified by severity — improved response time
- Streamlined deployment pipeline: YAML → Jinja → custom Splunk app
- Authored 10 incident response playbooks for active detections

Cloud Security (AWS / Azure)

- Built AWS Lambda for public IP reputation monitoring (Lambda, S3, Secrets Manager, SES)
- Coordinated IP blocking across Azure Firewall (4 regions) and AWS WAF during active campaigns
- Built isolated AWS Workspaces sandbox for malware/phishing analysis
- Deployed Grafana dashboards for SOC metrics and KPI tracking

Incident Response & Pen Testing

- Led response to 8+ security incidents (malware, data leaks, brute force, recon campaigns)
- Performed web application penetration testing (Burp Suite, Caido) — found and validated vulns
- Triaged 6+ HackerOne bug bounty reports (IDOR, Access Control, HTML Injection)
- Coordinated 7-phase organization-wide endpoint scan, quarantining dormant malware

AI-Powered Security

- Built AI SOC Analyst toolkit using MCP protocol for Splunk ES — LLM-augmented triage via VS Code
- Developed Splunk adaptive response action for Tor exit node classification

Security Intern | National Payments Corporation of India (NPCI) Mar 2023 – Jul 2023

- Enterprise infrastructure security, risk management, and IAM for UPI infrastructure
- Ransomware/malware analysis, secure software lifecycle, VAPT, cryptography

Security Engineer — SOC & Application Security | Sify Digital, Noida (On-site: Punjab National Bank) Jun 2022 – Aug 2023

- Managed SIEM operations (RSA NetWitness, ArcSight) — threat hunting, correlation rules, dashboards
- WAF administration (Radware AppWall, F5 ASM) — policy creation, deep traffic inspection, SAST/DAST
- NBAD monitoring (Cisco StealthWatch) — host groups, alarm analysis, threat response
- VAPT (Tenable Nessus, Burp Suite, Metasploit, sqlmap) — scans, reports, pentesting
- Honeypot management (Zscaler Deception) — decoys, API integrations, firewall containment
- Firewall management (Skybox, Fortinet) — policy analysis, HA config, vulnerability mitigation

Junior Developer | Virtual Analytics, Noida Oct 2020 – Jun 2022

- AI-powered attendance system (Python, OpenCV, Raspberry Pi) — facial recognition, no-touch
- IoT home automation (ESP32, MQTT, Flutter) — 200+ device capacity, security-first design
- Payment app (Flutter, Currency Cloud, Stripe) — international transfers, cross-platform
- E-commerce app (Flutter, AWS, Node.js) — Figma design to production with security testing

EDUCATION

PG Certification — Advanced Executive Program in Cybersecurity | IIIT Bangalore | 2023

B.Tech — Electrical & Electronics Engineering | AKGEC, Ghaziabad | 2021

CERTIFICATIONS

- Certified Ethical Hacker (CEH) — EC-Council (ECC3841279605)
- ArcSight ESM Technical Specialist • Enterprise Infrastructure Security
- Ransomware & Malware Analysis • Web Application Security Testing • VAPT & Ethical Hacking
- API Security Designer & Architect (APIacademy) • NPCI Internship

PERSONAL & OPEN SOURCE PROJECTS

- **AI Security Analyst:** MCP-powered SOC toolkit for LLM-augmented alert triage via VS Code (Python, Splunk ES)
- **Page Pilot:** Keyboard-driven Chrome new tab extension — published on Chrome Web Store (JavaScript)
- **Ollama Private Translator:** Self-hosted GPU translation with Ollama + gemma3n on AWS (HTML, JS, Nginx)
- **ES Theme Perfect Gameboy:** Retro Gameboy theme for EmulationStation handheld consoles (Shell, XML)
- **Homelab:** Self-hosted infrastructure on NixOS with Docker (Nix, Docker, JS)
- **24/7 Streaming Bot:** Automated YouTube live streaming with ffmpeg and Python on AWS

TECHNICAL SKILLS

SIEM	Splunk ES (SPL, custom apps, YAML/Jinja), RSA NetWitness, ArcSight ESM/Logger
SOAR	Custom Python integrations, n8n workflows, API orchestration
EDR	WatchGuard EPDR, Panda AD360, Orion
WAF	Radware AppWall, F5 ASM, AWS WAF & Shield
VAPT	Tenable Nessus, Burp Suite, Caido, Metasploit, OWASP ZAP, sqlmap, Nmap
Cloud	AWS (Lambda, EC2, S3, WAF, SAM, Secrets Manager, SES), Azure (Firewall, Security Center)
Languages	Python, JavaScript, Shell/Bash, C/C++, Dart, Lua, Nix, Embedded C, SPL
Frameworks	MITRE ATT&CK, NIST IR, OWASP Top 10, Kill Chain
AI/ML	Ollama, LLMs (gemma3n), MCP Protocol, AI-augmented SOC workflows
Other	Docker, Git/GitHub, Grafana, Figma, Raspberry Pi, Arduino, ESP32, Flutter

CTF PARTICIPATION & LANGUAGES

CTF: HackTheBox • TryHackMe • OverTheWire • PicoCTF • BlueTeam Labs Online

Languages: Hindi (Native) • English (Fluent)
